Dear Customer:

International Rectifier Corporation supports the European Union (EU) REACH (Registration, Evaluation, Authorization and Restriction of **C**hemicals) Regulation, which is consistent with our own commitment to promote the responsible manufacturing, use and handling of chemicals.

After careful review of the legislation and specifically the definition of an “article”, as defined in regulation (EC) No 1907/2006, Title II, Chapter 1, Article 7.1(a) & (b), it is International Rectifier’s current view that the products sold to you would be considered as “articles”. Furthermore, the definition in § 7.1(b) requires registration of an article only if it contains a regulated substance that “is intended to be released under normal or reasonably foreseeable conditions of use”. As such, International Rectifier Corporation products do not constitute articles for regulation based on their intended and anticipated use.

Additionally, International Rectifier Corporation products and packaging do not contain any of Substances of Very High Concern (SVHC) as defined in Article 33 (1) & (2) “Substances of Very High Concern” EC Title VII, Chapter 1, Article 57.

We are providing our suppliers with written notice of the new provisions of REACH. We are also advising of the importance of the compulsory registration of all substances that are sold, imported, manufactured or used in quantities exceeding one ton per year, in order to continue to operate legally within the European Union.

Should you require further information or have any questions, please do not hesitate to contact International Rectifier by E-Mail at Contractreview@irf.com referencing REACH in the Subject Line.
