GH Series
Space Qualified DC-DC Converters

Class K Hybrid
87% Efficiency

FEATURES
• 28V nominal input, other input buses available
• Low voltage outputs, 1 to 5V DC, up to 50W/20A output current
• Synchronous Rectification
• Ideal for FPGA and other digital loads and a power source for POL modules
• Integrated EMI filter to minimize CE input noise
• Designed for GEO applications with >15 years mission life
• DLA SMD qualified devices available
• Compact form factor, <110 grams
