200V
• High- and Low-Side
• Dual Input Half-Bridge
• Single Input Half-Bridge

600V
• Single High-Side
• High- and Low-Side
• Dual Input Half-Bridge
• Single Input Half-Bridge

1200V
• High- and Low-Side
• 3-Phase

Your Gate Driver is A Serious Matter

Which is Why IR is So Serious About Gate Drivers

Negative Transient Safe Operating Area

The IR Advantage:
• IR provides wide selection of 200V, 600V, and 1200V gate drive ICs for Single high-side, Half-bridge and 3-Phase topologies
• IR’s HVIC circuitry provides resistance to -Vs fault conditions for improved reliability
