HERMETIC JEDEC TO-257AA HIGH EFFICIENCY, CENTER-TAP RECTIFIER

16 Amp, 50 To 600 Volts, 35 To 50 ns trr

FEATURES
- Very Low Forward Voltage
- Very Fast Recovery Time
- Hermetic Metal Package, JEDEC TO-257AA Outline
- Low Thermal Resistance
- Isolated Package
- High Surge
- Available Screened To MIL-S-19500, TX, TXV And S Levels

DESCRIPTION
This series of products in a hermetic package is specifically designed for use at power switching frequencies in excess of 100 kHz. The series combines two high efficiency devices into one package, simplifying installation, reducing heat sink hardware, and the need to obtain matched components. These devices are ideally suited for Hi-Rel applications where small size and a hermetically sealed package is required. Common anode configurations are also available. Common cathode is standard.

ABSOLUTE MAXIMUM RATINGS (Per Diode) @ 25°C
- Peak Inverse Voltage ........................................ 50 to 600 V
- Maximum Average D.C. Output Current @ T\textsubscript{C} = 100° C ......................................... 8A
- Surge Current (Non-Repetitive 8.3 msec) .................................................. 60
- Operating and Storage Temperature Range ........................................ -55° C to +150° C

SCHEMATIC

MECHANICAL OUTLINE

Common cathode is standard. Contact the factory for performance characteristics for common anode and doubler.

Z-Tab package also available.
