11. POINT OF CONTACT Manufacturer's Representative or Customer Service Representative (978) 534-5776	12. DRAWING NUMBER NA
	13. SPECIFICATION NUMBER MIL-PRF-19500

14. PRODUCT CHANGE
This GIDEP PCN announces a change in the part marking type for International Rectifier (IR) HiRel parts built in Mexico. IR will be changing the marking process to include VideoJet marking technology. This process change notice serves to announce and validate the change to the part marking appearance.

Change;

The current marking process uses a direct contact offset printing method to mark the production devices. IR is changing the process method to VideoJet, which uses inkjet technology and requires no surface contact during printing of devices. See below for marking appearance example.

From: Offset Marking

To: VideoJet Marking

This process change has been qualified prior to its release, including device requalification in accordance with the performance requirements of MIL-PRF-19500.
